X-Tend / Epitalon

Pure A.E.D.G. (Epitalon) in 2 sealed vials of 50 mg – total 100mg A.E.D.G. (powder form).

This protein powder is guaranteed to be >98% purity as it is made primarily for labs and universities that do scientific studies.

One of the main advantages of epitalon is its anti ageing properties via its action on telomerase activation that causes the telomeres to lengthen and protect the DNA information from corruption during cell division.

It stimulates melatonin release, helps promote pineal gland health, has antioxidant properties, boosts energy levels, gives you better sleep just to name a few benefits.

Usage of epitalon in powder form (lyophilized powder) :

Before using the powder form you need to reconstruct the peptides using bacteriostatic water.

The reconstituted solution should be taken within 10-14 days and stored in the fridge.

The 50 mg vials are very good for this reason as you will not waste the precious epitalon.

If you want to keep it longer than this you will have to add some alcohol to it to preserve it but that will alter its content and properties to some extent.

Unopened vials of X-tend epitalon can last in a freezer for up to 18 months.

1. **Sublingual** usage is one of the easiest way to administer it. One drop contains approx. 0.25mg.

Recommended dosage 1-3 mg daily or 4-12 drops.

2. You can dissolve it in a few drops of water and **add to flavored (nicotine free) e-juice**. Note the amount of A.E.D.G. you add to what amount of e-juice so that you keep your dosing correct. Taking in this manner greatly reduces the amount of A.E.D.G. needed each day. 0.5mg to 2mg a day should be fine (depending on your size and desired results) and the A.E.D.G. will survive in your atomizer throughout the day.

Nouvelle-Vie

Every bottle holds **60 capsules** with powerful anti ageing effects, all inside a gastroprotective capsule, the A.E.D.G. (epitalon) is also in protective micro beads to ensure its delivery past the destructive stomach acids, into your intestines where it is quickly and easily absorbed.

Ingredients are A.E.D.G. (epitalon) plus L-Carnosine, Lycopene and Resveratrol combined for an amazing synergistic effect.

Recommended dosage is 2 pills or more per day.

2 pills will give you :

- Epithalamin (A.E.D.G. epitalon) – 2 mg
- L-Carnosine – 300 mg
- Lycopene – 48 mg
- Resveratrol – 250 mg

Pro-Healer BPC-157

The human body has a remarkable repair system, and an important component is a protein called **Body Protection Compound = PCB 157**.

Applied to external sores, cuts and abrasions, it will increase healing time dramatically. On internal wounds like ulcers or organ damages it will do miracle.

Content: 20mg BPC-157, 11ml Glycerol Water.

Dosages:

Topical: apply 1 or more drops on the wound, one or twice a day

Internal: take in the mouth 7 drops twice a day, morning and evening, preferably on empty stomach before meals.

Studies have shown that the PCB 157, taken orally, 1 mg daily, can help, among others, to reverse the damage of the ulcer, reduce inflammation throughout the digestive tract (inflammatory bowel disease) and cure liver damages from alcohol and other.

NAD+ powder

Container with **60 grams of NAD+** and a 1g scoop.
This is enough for 2 grams daily over 1 month.

NAD+ is an oxidizing agent – it accepts electrons from other molecules and becomes reduced. This reaction forms NADH, which can then be used to donate electrons.

NAD+ is used by the cells for energy production, neurological and cell to cell communication.

This NAD+ is a fine, white crystalline powder that dissolves extremely fast in water. It has a very mild lemon like taste.

NAD+ is very stable in the digestive tract and, therefore, has plenty of time for absorption into the bloodstream.

Dosage: Take 1 scoop of NAD+ into a big glass, add water or juice, mix lightly and drink. For best results take it one hour before or after eating.

NAD+ capsules

NAD+ is a coenzyme present in all the cells, and is necessary for the electron transfer process during the reactions of our metabolism to produce our ATP energy! It is also crucial for cells communication and signalling boosting the whole organism functions.

100 mg capsules

30 capsules per bottle

Each capsule contains >100mg of NAD+ high quality, at more than 98% purity, in an easy way to take, all vegan capsule.

30 mg pills

60 pills with 30 mg NAD+ each.

Place 1 to 3 tablets under your tongue and let dissolve.

Repeat as many times as you need in a day.

Minimum dose is 2 tablets, 1 morning and 1 evening, before or after meals.

NAD+ is non-toxic and larger amounts can be taken up to your desire.

SkinFactor

If used daily you will notice in 14 days or less a big difference in the quality and appearance of your skin. It achieves these results by repairing the epidermis and also by relaxing the muscles that cause stress lines and wrinkles.

It also heals and renew skin cells, moisturizes and helps to retain moisture in the skin. The core ingredients of the product are E.G.F. and Hexapeptide-3.

E.G.F. - Epidermal Growth Factor helps in the regeneration and repair of epidermal damage by stimulating the natural synthesis of hyaluronic acid, and helping the skin to absorb nutrients

Hexapeptide-3 reduces the fine lines and wrinkles in the skin by helping relax the stressed muscles that are responsible.

These two factors E.G.F. and Hexapeptide-3 work together for a unique synergistical effect on rejuvenating your skin.

It also contains **Glycerol** and **Rose water**.

The glycerol moisturize and soften the skin and the rose water improves the product fragrance besides her know benefits for the skin.

Dosage:

BioTrends recommends spraying 3 or 4 times on the palm, then lightly rub both hands, and then use your palms to apply the product on the skin of the face, neck and back of hands.

For localized applications, press 1 or 2 times the product on the tip of the index, and apply in circles on the desired location.

AlkapHi 30ml / 50 ml

AlkapHi is a powerful alkalizing solution to raise the PH level of water.

With only 5 or 6 drops, depending on the initial pH level of the water to be treated, you can raise the PH of a liter of water to more than 10.0

2 or 3 drops may be sufficient to reach a PH of 8 or 9.

The 30ml bottle can treat 80 liters of water.
The 50ml bottle had 40% more drops at a better price, and can treat up to 130 liters of water.

Each bottle of AlkapHi also comes with an 80pc pH tester strips booklet to help you measure and see the changes in the water ph.

Instructions:

Always shake the bottle prior to use.

After shaking, unscrew top and squeeze dropper 4 or 5 times to allow fresh mix of the solution into the dropper.

Use your pH strips to test the pH level of your water and add 2 drops of AlkapHi at a time, testing after each time, until your water reaches your desired level.

Use this to gauge how many drops you require for future use based on the volume of water you will add the drops to.

Always make sure to replace the top and screw the lid on tightly.

If you do not use your drops for some time, shake the bottle occasionally to stop salt crystal build up in the dropper.

CIS 180/540/1200 : Collagen Induction System

Helps to remove roughness, wrinkles, scars and discoloration by increasing collagen production in the skin. Many beauty salons offer this treatment, but at much higher prices. It comes in 3 sizes small mid and larger size rollers.

The small roller has 180 micro needles of 0.5mm length. It is best used for small, hard to get at and tender areas such as around and under the eyes, sides of nose.

The mid size roller has 540 micro needles of 1.0mm length. It is recommended for use on the face, neck and back of hands.

The largest roller has 1200 micro needles of 1.5mm length. For large surfaces, scars, discoloration.

All of them include a storage case that also acts as stand for cleaning/sterilizing the roller while protecting it from damage.

Usage :

1. Use alcohol to disinfect the needles of the roller and the skin where you will apply the treatment.
2. Using moderate pressure (not hard) roll across treatment area in 4 directions, up and down, left to right, 45 degrees left and 45 degrees right, 6 times each. Be sure to roll in a straight lines. Do not allow side to side movement. Keep pressure speed and direction consistent at all times.
3. Do not try to apply to an area larger than 6cm X 6cm at a time. Break up larger areas into several smaller applications.
4. Thoroughly rinse your roller with alcohol and store in its plastic container until next use.
5. Second and subsequent applications – wait at least 1 week between applications or until the skin is sufficiently healed from the previous application.
